# Architecture Overview

The system consists of a Next.js 14 frontend, FastAPI backend with 4 agent threads, PostgreSQL 15 database, and Redis 7 broker, all running in a containerized environment.

## Service Map:

| Service | Technology | Port/Queue | Role |
|---|---|---|---|
| Frontend | Next.js 14 | :3000 | React + Tailwind + SSE |
| Backend API | FastAPI | :8000 | Uvicorn + Sim Engine + SS |
| PostgreSQL | postgres:15 | :5432 | Cases, Tickets, WOs, Even |
| Redis | redis:7 | :6379 | Celery broker (optional) |
| Shift Director | Thread | — | KPI monitor, phase dispat |
| Clerk+IT Hybrid | Thread | clerk_ops | Tickets, cases, change re |
| IT Functional | Thread | it_ops | SLA, inventory, patches |
| Finance & Audit | Thread | finance_audit | Revenue, monthly pkg, aud |

# Nightly Run Results

**Nightly Run — Key Performance Indicators**

| Metric | Value |
|---|---|
| Real Elapsed | 100.0 min |
| Agent Cycles | 2,460 |
| WOs Created | 1,020 |
| WOs Completed | 1,020 |
| WOs Failed | 0 |
| Success Rate | 100.0% |
| Events Logged | 4,551 |
| Artifacts | 120 |

# Test Evidence & Security

### Backend Tests (pytest): 10/10 passed in 3.21s

✓ test_detect_repeated_failed_logins_flags_burst
✓ test_detect_repeated_failed_logins_ignores_sparse
✓ test_time_to_disposition
✓ test_seed_determinism
✓ test_ticket_sla_due_date
✓ test_sse_event_keys
✓ test_queue_routing_completeness
✓ test_clerk_ops_routing
✓ test_it_ops_routing
✓ test_finance_audit_routing

### Frontend Lint (ESLint): No warnings or errors

## Security & Compliance:

✓ Public Data Mode: All data from publicly accessible portals
✓ Synthetic Records: All generated — no real PII
✓ No Secrets: No credentials in any evidence file
✓ SBOM: CycloneDX SBOMs for Python and Node
✓ Watermark on all generated PDFs

# Appendices & Evidence Files

| App | File | Description |
|---|---|---|
| A | docs/evidence/system_info.txt | OS, kernel, disk, memory |
| B | docs/evidence/tooling.txt | Docker, Python, Node versions |
| C | docs/evidence/containers.txt | Docker container status + digests |
| D | docs/evidence/sbom/python_sbom.json | Python CycloneDX SBOM |
| E | docs/evidence/sbom/node_sbom.json | Node CycloneDX SBOM |
| F | docs/evidence/pip_freeze.txt | Complete Python packages |
| G | docs/evidence/npm_ls_depth0.txt | Complete Node packages |
| H | docs/evidence/pytest_results.txt | Full pytest output |
| I | docs/evidence/eslint_results.txt | ESLint output |
| J | docs/evidence/app_health.txt | Endpoint health checks |
| K | docs/evidence/git_info.txt | Git HEAD, log, diff stats |
| L | docs/evidence/run_metrics.json | Complete run metrics |

### Reproducibility: ./scripts/cloud_shift_demo.sh 20260225 30
